

COMPANY PROFILE

We are a residential home, focusing on specialised care of residents with memory-impacting conditions such as Alzheimer's disease and other forms of dementia.

MEMORY CARE

Our homes are designed to provide a safe, yet homely structured environment. Specialised caregiving by a well-trained team to deal with unique behaviour and anxiety is core to creating personalised routines that lower anxiety and reduce confusion. Small pets are most welcome.

ENVIRONMENT

Resthill Memory Care is safe, tranquil country living on a 3ha property, centrally situated between Lanseria Airport, Centurion and Fourways.

BURKEI HOME focuses on residents who are not frail but are in a **moderate stage** of cognitive decline but require supportive care with regards to medication, grooming and activities. These residents are still having good mobility, eat by themselves and are in good general health.

ROBUSTA HOME focuses on residents who are frail and in a **severe stage** of cognitive decline. They require substantial personalised care regarding most aspects of their activities of daily living and have limited mobility, feeding, toileting and personal care. Due to decline the risk of falling is increase.

KARROO HOME focuses on residents who are in their last stage of cognitive decline. Full care is provided within a palliative care setting and residents are mostly bed ridden. Pressure sores are our biggest challenge, therefore a specially trained team works together with the wound care nurse and doctor to provide that extra layer of support.
